

Metaplex has been the reference for many years in the processing of the most diverse types of plastics according to the wishes of customers. Whether it concerns machining operations on CNC machines, bending, gluing, welding, mounting or polishing of plastics, Metaplex masters these all and can therefore act as a one-stop-shop for its customers. We work for a variety of clients in various sectors; such as industry, construction, interior design, shop fitting and the advertising sector. Our product portfolio is therefore very broad and extends from unique pieces to large volumes for industrial players where Metaplex delivers “just in time” all over Europe.

To grow with us, we are looking for a:

## Woodworker mounting & assembly (m/f)

### Your position:

You mount and assemble various parts into a finished product. For this you will receive the necessary parts from the machining department or you can saw them to the right size yourself. You use both mechanical and glue connections and know how to create unique pieces and shapes. You are very precise and always strive for excellent quality.

Thanks to your experience, you have a good insight into efficient tailor-made production and you later on you can support sales to quickly draw up competitive quotes.

You work independently and understand better than anyone the importance of order, neatness and correctness.

### Your profile:

- You have at least 5 years of experience, preferably in a plastics processing company or a carpentry workshop
- You have a broad technical understanding and like to work with both machines and your hands
- You can read plans
- Accurate and efficient execution is central to you
- You like to work in a team, but you also know how to work out solutions independently
- You have a hands-on mentality
- You master the common MS Office applications
- Excellent knowledge of Dutch

*Creative with plastics*

### Job-related competencies:

- Assembling, mounting or fixing pieces by screwing and gluing
- Gluing and polishing
- Check whether the assembly has been done correctly (use, appearance)
- Cleaning and tidying up the work area (equipment, attachments)
- Perform basic preventive or corrective maintenance of machines or equipment

### Personal competences:

- Creative thinking (inventiveness)
- Communicative
- Results-oriented
- Plan reading
- Understand the importance of rules and agreements
- Able to adapt to changing circumstances (flexibility)
- Have a sense of accuracy
- Work independently

### We offer you:

- A creative and varied job within a rapidly growing company
- The freedom to work independently and take on a wide range of responsibility
- A tailor-made training to familiarize you with the world of plastic processing
- A corporate culture where we opt for a close-knit team with which we achieve results together and take personal responsibility
- An interesting salary package with fringe benefits based on acquired experience and responsibilities.

### Would you like to come and talk?

Do grab a coffee with us. Contact us quickly and email us your CV with a short introductory email as motivation/intro to Sven Danneels: [sven@metaplex.be](mailto:sven@metaplex.be)

We treat your application with complete discretion.
